

What You Will Gain By Attending This Class

Attendees of the 10-Hour OSHA class will walk away from this training with a knowledge of OSHA requirements.

The importance of learning and adhering to proper safety procedures, as well as practical understanding of why safety conscious behavior is vital for each and every worker on the job-site.

This seminar will help to influence a positive “safety culture”, where employees help create a safer work environment. All who attend will receive a manual of training materials, an OSHA card and certificate of completion.

American Society of Safety Engineers

ASSE is the oldest and largest professional safety organization, founded in 1911. With members that are involved with managing, supervising, and consulting on safety, health, and environmental issues in industry, insurance, government, and education.

Safety Training Instruction & Research Center

Our purpose is to provide efficient, cost effective training to education, industry, government, and business workplace environments. We provide safety training and instructional resource information to educate employers and employees about the values, practices and benefits of an injury free workplace and lifestyle.
